Interactive comment on “ORCHILEAK: A new model branch to simulate carbon transfers along the terrestrial-aquatic continuum of the Amazon basin” By Ronny Lauerwald et al. A. Kerkweg, kerkweg@uni-bonn.de, Received and published: 7 April 2017

Dear authors, in my role as Executive editor of GMD, I would like to bring to your attention our Editorial version 1.1: <http://www.geosci-model-dev.net/8/3487/2015/gmd-8-3487-2015.html> This highlights some requirements of papers published in GMD, which is also available on the GMD website in the ‘Manuscript Types’ section: [http://www.geoscientific-model-development.net/submission/manuscript\\_types.html](http://www.geoscientific-model-development.net/submission/manuscript_types.html) In

C1

particular, please note that for your paper, the following requirement has not been met in the Discussions paper: “The main paper must give the model name and version number (or other unique identifier) in the title.” Please add a version number for ORCHILEAK in the title upon your revised submission to GMD. Yours, Astrid Kerkweg

We changed the title accordingly to “ORCHILEAK (revision 3875): A new model branch to simulate carbon transfers along the terrestrial-aquatic continuum of the Amazon basin”
