Received and published: 4 April 2018

ear authors,

in my role as Executive editor of GMD, I would like to bring to your attention our Editorial version 1.1: http://www.geosci-model-dev.net/8/3487/2015/gmd-8-3487-2015.html This highlights some requirements of papers published in GMD, which is also available on the GMD website in the 'Manuscript Types' section: http://www.geoscientific-model-development.net/submission/manuscript\_types.html In particular, please note that for your paper, the following requirement has not been met in the Discussions paper:

Printer-friendly version

Discussion paper

• "The main paper must give the model name and version number (or other unique identifier) in the title."

Please provide the name and a version number of your method for dynamic hydrological discharge modelling in the title of your revised manuscript. Note, that a name and a version number are important to identify your development (name) and its state (version number).

Best regards, Astrid Kerkweg
