Received and published: 1 July 2018

Dear colleague,

Thanks for you comment. The link problems should be fixed now.

For the two Geant4 source codes :

https://gitlab.com/dsarria/av_prob.git

https://gitlab.com/dsarria/RREA_characteristics.git

The access was not set to public yet. If you still have problems, please send me an

e-mail and I will share the codes.

The link to the GRRR GitHub's deposit (A. Luque's code) should have always been working.

https://github.com/aluque/grrr/tree/avalanches

I tested it from several computers, with several web browsers.

Maybe access is restricted for Russia. In this case, contact Alejandro Luque: aluque@iaa.es .

Best regards, -David Sarria
