

***Interactive comment on “Weak-constraint inverse modeling using HYSPLIT Lagrangian dispersion model and Cross Appalachian Tracer Experiment (CAPTEX) observations – Effect of including model uncertainties on source term estimation” by Tianfeng Chai et al.***

**Tianfeng Chai et al.**

tianfeng.chai@noaa.gov

Received and published: 4 October 2018

The HYSPLIT version number is added to the title. In addition, the version number has been explicitly given in abstract section and the main text.

The url location (<https://www.ready.noaa.gov/HYSPLIT.php>) to obtain the newest version of the model, has been provided in Code and data availability part.
