Received and published: 22 October 2018

Dear authors,

in my role as Executive editor of GMD, I would like to bring to your attention our Editorial version 1.1:

http://www.geosci-model-dev.net/8/3487/2015/gmd-8-3487-2015.html

This highlights some requirements of papers published in GMD, which is also available on the GMD website in the 'Manuscript Types' section:

http://www.geoscientific-model-development.net/submission/manuscript_types.html

Printer-friendly version

Discussion paper

In particular, please note that for your paper, the following requirement has not been met in the Discussions paper:

• "The main paper must give the model name and version number (or other unique identifier) in the title."

Please add at least the acronym of your new parametrisation (pSPPT) in the title of your manuscript upon revision of the article. Additional, if applicable, add a version number (the method might be changed in the future and those methods should be distinguishable).

In addition, regarding the code availability section, in case it is possible for the user to obtain a license, please add further information on how to obtain it. Be aware, that in all cases the exact version of your method published here, must be kept.

Yours,

Astrid Kerkweg
