

Interactive comment on “Reconstructing climatic modes of variability from proxy records: sensitivity to the methodological approach” by Simon Michel et al.

Lauren Gregoire (Editor)

l.j.gregoire@leeds.ac.uk

Received and published: 15 February 2019

Dear authors,

The open discussion has been closed. Based on reviewers comments, the manuscript requires major revisions. I note in particular that reviewers highlight the need for: (i) text editing to improve readability and conform to our rules on titles, (ii) a working link to the data and code, (iii) additional work and/or justification of the methods to ensure robustness of the work. To proceed with the evaluation of your manuscript and its potential publication, please address all of the reviewers' and editors' comments and requests.

C1

Best regards, Lauren Gregoire
