Received and published: 5 December 2018

Dear authors,

in my role as Executive editor of GMD, I would like to bring to your attention our Editorial version 1.1:

<http://www.geosci-model-dev.net/8/3487/2015/gmd-8-3487-2015.html>

This highlights some requirements of papers published in GMD, which is also available on the GMD website in the ‘Manuscript Types’ section:

http://www.geoscientific-model-development.net/submission/manuscript_types.html

Printer-friendly version

Discussion paper

In particular, please note that for your paper, the following requirements have not been met in the Discussions paper:

- "The main paper must give the model name and version number (or other unique identifier) in the title."

In order to simplify reference to your developments, please add the name of your software tool (e.g., "statistical toolbox") and its version number in the title of your article in your revised submission to GMD. The title could be something like "Reconstructing climatic modes of variability from proxy records using the statistical toolbox version 1.0: sensitivity to the methodological approach"

Yours,

Astrid Kerckweg
