Interactive comment on "The Cloud_cci simulator for the ESA Cloud_cci climate data record and its application to a global and a regional climate model" *by* Salomon Eliasson et al.

A. Kerkweg

kerkweg@uni-bonn.de

Dear Authors,

In accordance to our Editorial v1.1, please add a version number for the Cloud_cci simulator in the title of your manuscript upon revision.

As explained in https://www.geoscientific-model-development.net/about/manuscript_types.html GMD is encouraging that authors upload the program code of models (including relevant data sets) as a supplement or make the code and data or the exact model version

described in the paper accessible through a DOI (digital object identifier). In case your institution does not provide the possibility to make electronic data accessible through a DOI you may consider other providers (eg. zenodo.org of CERN) to create a DOI. Please note that in the code accessibility section you can still point the reader how to obtain the newest version.

If for some reason the code and/or data cannot be made available in this form (e.g. only via e-mail contact) the "Code Availability" section need to clearly state the reasons for why access is restricted (e.g. licensing reasons).

Best, Astrid Kerkweg (executive Editor)
