Received and published: 23 January 2019

Dear authors,

As topical editor for this manuscript, I am posting this comment to inform you about the next steps in the revision process.

You will have seen that Anonymous Referee #1 has requested mayor revisions to clarify two main questions, one in relation to how Newtonian relaxation is applied in the model and the other about the nudging time scale. Given that comments of Anonymous Referee #2 refer to minor changes, I recommend that you upload a revised version, taking into account the comments of *both* referees. I will then ask Anonymous Referee #1 to re-evaluate the revised manuscript in perspective of the clarifications you have already

posted in two author comments and anything else you want to add in form of a rebuttal.

Best greetings

Heiko Goelzer
