Received and published: 12 March 2018

Code that is to be made publicly available, must be made publicly available before the paper is accepted for GMD. The precise version of the code discussed in the manuscript must be made available. The current best practice is for this code to be uploaded to a public repository and a DOI assigned. The DOI should be cited in the manuscript. github/gitlab are inadequate because they do not readily link to the precise version of the code. However, making github code citable is not difficult; see: https://guides.github.com/activities/citable-code/
