Interactive comment on "CLIMADA – a global weather and climate risk assessment platform" *by* Gabriela Aznar-Siguan and David N. Bresch

Astrid Kerkweg

kerkweg@uni-bonn.de

Received and published: 14 March 2019

Dear authors,

it is definitely a good think to let the readers know, where to find the newest version of a software. Therefore a statement in the code availability section telling where to find the newest version of the code is very welcome. However, the publication was based on one specific version and the idea of the GMD policy is, that exactly the code which was used for the publication should stay permanently available. Unfortunately, GitHub is not necessarily a permanent archive. Therefore please provide one permanent archive for the code linked to the publication in addition to your usual code repository.

Best regards, Astrid Kerkweg
