Thanks for your manuscript. When code availability is referencing Github the model version should be marked as a release. There seems to be a release 1.0 available only. Also authors are encouraged to create a DOI for the release and cite this in the paper. For code in Github a DOI can easily be created through Zenodo, see <https://guides.github.com/activities/citable-code/> for details. Lutz Gross GMD Executive Editor

Thank you for these suggestions. We have now modified the GitHub release numbering to reflect the versioning in the manuscript title. Release 2.0 can be found here: <https://github.com/UCLALES-SALSA/SALSA-standalone/releases/tag/2.0>

C1

We have also obtained a DOI for the release which is: 10.5281/zenodo.1251668

We will provide the DOI and the link to the GitHub release version in the revised manuscript
