Received and published: 27 April 2018

As explained in https://www.geoscientific-model-development.net/about/manuscript_types.html GMD is encouraging authors to upload the program code of the model described in the manuscript (including relevant data sets) as a supplement or make the code and data available at a data repository preferable with an associated DOI (digital object identifier) for the exact model version described in the paper. Access via e-mail request is not considered a persistent access mode and authors need to give reasons in the manuscript why access is restricted. Typically this would be for reasons of licensing.
