Dear Dr. Chiel van Heerwaarden (the editor), Dear Dr. L.A. Melsen (the reviewer #1),
Dear the anonymous referee #2,

Thank you so much for all your thoughtful comments. I really appreciate your comments and advice. I uploaded my replies as the supplement files (in pdf format). I need to work on the manuscript until September in order to provide you the revised version. I sent an email to Dr. Chiel van Heerwaarden (the handling topical editor) to explain my difficulty. I hope that you (the two reviewers) and the GMD journal will allow me to have an extended submission deadline for the revised manuscript of my article. It's really

C1

important for me. Thank you so much for your help.

Best regards, Trung Nguyen
