Received and published: 2 March 2018

This article has been withdrawn at the request of the author due to the following reason:

I request withdrawal of the online article GMD-2018-8 due to institutional reasons. The publication of the model description and model code of CityChem-EPISODE had been approved by NILU ahead of the submission. Meanwhile, however, a new publication strategy was implemented at NILU. The published online article is not compatible with NILU's new publication strategy.

In collaboration with NILU it is planned to submit a substantially revised manuscript

C1

on CityChem-EPISODE as Part II of a two-part publication on the EPISODE model. I will be the main author of the Part II paper and two scientists from NILU will join as co-authors. Part I will be led by NILU.

This discussion is now closed.

Jason Williams.
