

Interactive comment on “Global hydro-climatic biomes identified via multi-task learning” by Christina Papagiannopoulou et al.

L. Gross

l.gross@uq.edu.au

Received and published: 4 May 2018

Following the guideline in https://www.geoscientific-model-development.net/about/manuscript_types.html model code must be available when the manuscript is submitted. As it is planned that the code is published in github this should be completed prior to submission/publication with the relevant software version tagged as a release. The authors are also encouraged to create a DOI via Zenodo, see <https://guides.github.com/activities/citable-code/>. The relevant data should be supplied as supplement or cited via a DOI.
