

Interactive comment on “FORHYCS v1.0: A spatially distributed model combining hydrology and forest dynamics” by Matthias J. R. Speich et al.

Matthias Speich

matthias.speich@wsl.ch

Received and published: 26 August 2019

We are in the process of uploading the complete FORHYCS code (including a manual) to our institution's repository (<https://www.envidat.ch>). The code will be assigned a DOI published under an open license. However, we will need some additional time to finalize this process (about one or two weeks). We hope that this will not disturb the editorial process too much.

Best regards

Matthias Speich
