Received and published: 26 July 2019

Dear authors,

in my role as Executive editor of GMD, I would like to bring to your attention our Editorial version 1.2:

<https://www.geosci-model-dev.net/12/2215/2019/>

This highlights some requirements of papers published in GMD, which is also available on the GMD website in the ‘Manuscript Types’ section:

http://www.geoscientific-model-development.net/submission/manuscript_types.html

In particular, please note that for your paper, the following requirement has not been

Printer-friendly version

Discussion paper

met in the Discussions paper:

- "The main paper must give the model name and version number (or other unique identifier) in the title."

Please add a version number for BOLCHEM in the title upon your revised submission to GMD. Be aware, that exactly the version published and evaluated in this article needs to be permanently archived (and provided to the editor and the reviewers).

Furthermore, provide a reason, why BOLCHEM can not be made publicly available. You are publishing in an open access journal, why not follow open source policy? Finally note, that according to our new Editorial (v1.2) all data and analysis / plotting scripts should be made available.

Yours,

Astrid Kerkweg
