Interactive comment on "The Coastline Evolution Model 2D (CEM2D) V1.1" *by* Chloe Leach et al.

Anonymous Referee #2

Received and published: 18 December 2019

The authors introduce a new numerical scheme for improving a landscape evolution model, the CEM. However, in the submitted text there are still many unresolved questions regarding the improvements that this new numerical approach offers for predicting coastal evolution. Please read my comments in the attached document.

I consider this work of significant relevance and I look forward to read a new revised version of this work.
