We thank the referee for his comments. Taking all comments from both referees into consideration, we find it necessary to revise our model and redo the simulations. Hence, we will address all matters for which we have to repeat the simulations, e.g., calculation of R_a , output of dry deposition velocities, etc., at the same time. We will also check the definition of the replacement height d in our formulation.

Interactive comment on Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2019-21>,
2019.
