Hi

1. I think it would be helpful to name the model setup that was used to generate the data volumes in the caption of Table B4 (e.g. number of atmosphere and ocean grid points and levels).

2. In chapter 6.3 I would add the need for one version controlled homepage where everyone can find all necessary information. Explanation: For example, the homepage http://clipc-services.ceda.ac.uk/dreq/tab01_3_3.html is outdated, or, in other words, only valid for DR 1.00.29 (at least this is given in the title of the index page). All the information of this page should be accessible via one version controlled homepage such as https://github.com/WCRP-CMIP/CMIP6_CVs.

3. Typos:

   - Table 1: FLuxes
   - Line 161: the the
   - Line 236: aas
   - Line 409: communications (-s?)

Kind regards,
Christopher
