## Dear referee,

We would like to thank you for providing the review of the manuscript and the constructive comments, and we are very glad to note the appreciation of the software's potential. We also acknowledge your comments, especially for improving the clarity of used methodologies, input data and results, and we provide a point-by-point answer in the supplemented pdf (see link below). The changes to the manuscript are provided as quoted text, which will be included in the next revised version of the manuscript.

Discussion paper

Yours sincerely, Dr. Hendrik Wouters (on behalf of the co-authors)
