Dear editor,

Please find enclosed (supplement pdf) our detailed responses to the minor revisions suggested by both reviewers. Most of the figures have been reworked to include labels, following suggestions by D. Lunt. New figures have been added as well (Fig. 1; Fig. 14; Fig. 16; Fig 17; Fig. 18; Fig. 20). We have moved the performance section in the appendixes as suggested by rev#1. We provide several new references and have reworked the introduction to fit with both reviewers suggestions. We benefited from the help of J.-L. Dufresne, who is now a co-author of the paper. The detailed responses can be found in the attached pdf file. Best regards,

C1

Pierre Sepulchre on behalf of co-authors.
