

Dear Violaine,

Thanks for addressing the reviewer's comments. The only remaining issue, which I should have picked up last time, is that the Zenodo citations in the code and data availability section are presented incorrectly. You have included URLs for locations on the Zenodo website. This is incorrect for two reasons. First, you should be using the DOI, not the URL, and second the citations should be presented in the bibliography and cited from the text like any other reference.

If you navigate to any of your Zenodo pages, e.g. <https://doi.org/10.5281/zenodo.2669396>, and look to the bottom right, it shows you the correct form of the bibliography entry, in that case it is:

Piton Violaine. (2019). Grid for T-UGO [Data set]. Zenodo.
<http://doi.org/10.5281/zenodo.2640763>

An example of a GMDD manuscript with correct Zenodo citations in the code and data availability section is: <https://www.geosci-model-dev-discuss.net/gmd-2019-86/gmd-2019-86.pdf>

Regards,

David

Dear David,

I changed the Zenodo citations in the Code and/or data availability section, as well as in the References, according to your suggestions. I hope this is correct now.

Best,

Violaine
