Dear authors,

in my role as Executive editor of GMD, I would like to bring to your attention our Editorial version 1.1:

http://www.geosci-model-dev.net/8/3487/2015/gmd-8-3487-2015.html

This highlights some requirements of papers published in GMD, which is also available on the GMD website in the 'Manuscript Types' section:

http://www.geoscientific-model-development.net/submission/manuscript_types.html
In particular, please note that for your paper, the following requirements have not been

Printer-friendly version

Discussion paper

met in the Discussions paper:

- 1 "The main paper must give the model name and version number (or other unique identifier) in the title."// Accordingly, add the acronym WAYS including a version number to the title.
- 2 GMD is encouraging authors to upload the program code of models (including relevant data sets) as a supplement or make the code and data of the exact model version described in the paper accessible through a DOI (digital object identifier). In case your institution does not provide the possibility to make electronic data accessible through a DOI you may consider other providers (eg. zenodo.org of CERN) to create a DOI. Please note that in the code accessibility section you can still point the reader how to obtain the newest version.

If for some reason the code and/or data cannot be made available in this form (e.g. only via e-mail contact) the "Code Availability" section need to clearly state the reasons for why access is restricted (e.g. licensing reasons). Consequently, you need to provide a reason in the code availability section, why the code can not be made publicly available. Without a proper reason, it is not acceptable that the code is not made public available before the final publication of the article.

Yours.

Astrid Kerkweg (Executive Editor)
