Dear Astrid Kerkweg,

Thank you for your comment and highlighting the need to attach a DOI to the version of the code presented here. We have done as you suggest and used Zenodo, the DOI is: <http://doi.org/10.5281/zenodo.2654853>, we will make sure this appears in the final manuscript along with the version number (v1.0.0) in the title.

Kind Regards, Ewan
