Interactive comment on "Modeling lightning observations from space-based platforms (CloudScat.jl 1.0)" *by* Alejandro Luque et al.

Anonymous Referee #1

I think this is going to be a very useful model. The presentation is clear and it obviously improves over the previous methods described in the references.

Some minor imperfections:

Figure 2. Typo Ouline -> Outline

Line 345 – reference to Figure 5. Left panel should be right panel

My final opinion: After fixing the imperfections, Publish It!
