Interactive comment on "A spatially-explicit approach to simulate urban heat islands in complex urban landscapes" *by* Martí Bosch et al.

Martí Bosch et al.

marti.bosch@epfl.ch

Dear executive editor of GMD,

thank you for pointing out the two issues. Regarding the title, we suggest changing it to "A spatially-explicit approach to simulate urban heat mitigation with the InVEST software (v3.8.0)". Regarding the archive, the code version used for this manuscript has been archived to Zenodo at https://doi.org/10.5281/zenodo.3970608.

We hope that this addresses your comment. Kind regards, Martí
