

Interactive comment on “The Community Multiscale Air Quality (CMAQ) Model Versions 5.3 and 5.3.1: System Updates and Evaluation” by K.AppelWyat Appel et al.

Anonymous Referee #1

Received and published: 4 November 2020

This manuscript provides a description and evaluation of the newest versions of the CMAQ modeling system. The paper is extremely well-written, comprehensive and thorough. For the first time in my 30+ year career, I can find nothing to criticize or comment on. I recommend that the paper be published as is. Well done authors!
