Dear Astrid Kerkweg,

As suggested, we will include the details about where to find and download the WRF version that we use in our study around Mount Kenya in the new version of the manuscript.

In the code and data availability section we added the following sentence: "The Weather Research and Forecasting (WRF) model V3.8.1

C1

is freely available online and can be downloaded from the users' page: https://www2.mmm.ucar.edu/wrf/users/download/get_sources.html"

Kind regards,

Martina Messmer on behalf of the coauthors
