Received and published: 22 June 2020

The authors have made a good-faith effort to respond to all referee comments. In my mind, these center on (1) the mismatch between the title of the paper and the "proof of concept" scope in the authors' minds; (2) a need for overall increased clarity; and (3) a need for additional testing and evaluation. I look forward to seeing a revised manuscript that addresses the referees' careful and constructive contributions.
