Dear Editor,

we submit the revised version of our manuscript which includes the minor comments from you:

- We added labeling of the figures (a, b, c, ...) to the panels of Figures 2, 3, 5 and 6
- We adjusted the precision in Tables 2, 4 and 5, following the precision given in Volker et al. (2017), which we mention in the caption of Table 2.

The modifications are marked in blue in the uploaded PDF.

We think that with these changes, we addressed all of your comments.

Thank you and kind regards,
Axel Kleidon
