Dear authors,

in my role as Executive Editor of GMD I would like to bring to your attention, that the GMD rules require a permanent archiving of exactly that model code, with which the result published in an article have been produced. Thus if your model developments are based on MESSy version 2.54 and will be available in version 2.55 you still have to make the information available how the intermediate version the results were produced with, can be accessed.

Best regards,,

Astrid Kerkweg
