Dear Editor,

In reference to the manuscript `gmd-2021-1` entitled "Decadal climate predictions with the Canadian Earth System Model version 5 (CanESM5)" by Sospedra-Alfonso et al.:

We noticed a typo in the inline equation of the second-to-last paragraph of page 6 of the manuscript, which was added during the review process. We ask for the following correction to be made before the paper is published:

Change "$r_i = \sqrt{q_{e_i}} r_{XY_i}$" **to** "$r_i = \sqrt{q_i} r_{XY_i}$"

That is, the subscript e must be dropped from q_{e_i} so it reads q_i instead. As it can be seen from the definition of r_i in Eq. 6 of the paper, and the definition of q_i in Eq. 5, the suggested change gives the correct expression.

Sincerely,

Reinel Sospedra-Alfonso on behalf of all authors
