

Dear Editor,

Thank you and Polina Shvedko for letting us know about the color problems of some of our figures. We changed Figures 4, 5 and 7 to a different color scheme that should be visible to readers with color vision deficiencies. We also changed one of the vertical lines in Figure 4a to a dashed type to make sure that it is easily distinguishable from the vertical red line for all readers.

With my best regards,

Pedro Duarte (on behalf of all co-authors)
