Production files gmd-2022-79

Dear Andrew Yool (GM editor)

Hereby, I submit the files needed for production of the manuscript gmd-2022-79

Non-Redfield carbon model for the Baltic Sea (ERGOM version 1.2) -- Implementation and Budget estimates

Thomas Neumann, Hagen Radtke, Bronwyn Cahill, Martin Schmidt, and Gregor Rehder

First of all, we would like to thank you and the referees again for the careful consideration of the manuscript. We updated the Zenodo repository. In particular, the data used for the figures were updated because a new figure was introduced in the revised version of the manuscript.

A request from the technical evaluation was to ensure that the used color schemes allow readers with color vision deficiencies to correctly interpret figures. We use different line styles and checked the figures with the Color Blindness Simulator.

With best regards, Thomas Neumann
