

According to the message:

Justification (visible to authors and reviewers only):

Dear Authors,

the manuscript is well-written and is well within the scope of GMD.

It is GMD guideline that the name and version of the employed model should appear in the title. (personally, I could live with your title, but we cannot ignore this requirement)

Best wishes, Simon

We modified the manuscript title into:

Modeling Collision-Coalescence in Particle Microphysics: Numerical Convergence of Mean and Variance of Precipitation in Cloud Simulations Using University of Warsaw Lagrangian Cloud Model (UWLCM) 2.1

Manuscript revision into new version

We have diligently implemented the reviewers' suggestions into the manuscript, making sure all changes are clearly visible in the Author's track-changes file. These revisions are in line with our responses to the reviewers' comments. Additionally, in each of our responses, we've provided a detailed record of the specific modifications made, following this format: reviewer's question, our response, and corresponding manuscript changes.
