Figure S1. Resolution of ocean grid.
Figure S2. Simulated temporal time–latitude diagram of daily (a) precipitation and (b) I averaged over 15°W - 20°E under MH climate condition for a specific year, with x-axis representing the day of the year and y-axis the latitude. (c) Time sections of precipitation averaged over 15°W - 20°E at 12.3°N (black line) and at 4.7°N (red line), filtered with high frequency variability (period less than 10 days) removed. (d) Time sections of I averaged over 15°W - 20°E at 12.3°N, filtered with high frequency variability (period less than 10 days) removed.
Figure S3. Simulated temporal time–latitude diagram of daily (a) precipitation and (b) $I$ averaged over 15°W - 20°E under MH climate condition for a specific year, with x-axis representing the day of the year and y-axis the latitude. (c) Time sections of precipitation averaged over 15°W - 20°E at 12.3°N (black line) and at 4.7°N (red line), filtered with high frequency variability (period less than 10 days) removed. (d) Time sections of $I$ averaged over 15°W - 20°E at 12.3°N, filtered with high frequency variability (period less than 10 days) removed.
Figure S4. Simulated temporal time–latitude diagram of daily (a) precipitation and (b) $I$ averaged over 15°W - 20°E under MH climate condition for a specific year, with x-axis representing the day of the year and y-axis the latitude. (c) Time sections of precipitation averaged over 15°W - 20°E at 12.3°N (black line) and at 4.7°N (red line), filtered with high frequency variability (period less than 10 days) removed. (d) Time sections of $I$ averaged over 15°W - 20°E at 12.3°N, filtered with high frequency variability (period less than 10 days) removed.
Figure S5. Simulated temporal time–latitude diagram of daily (a) precipitation and (b) I averaged over 15°W - 20°E under MH climate condition for a specific year, with x-axis representing the day of the year and y-axis the latitude. (c) Time sections of precipitation averaged over 15°W - 20°E at 12.3°N (black line) and at 4.7°N (red line), filtered with high frequency variability (period less than 10 days) removed. (d) Time sections of I averaged over 15°W - 20°E at 12.3°N, filtered with high frequency variability (period less than 10 days) removed.
