Dear editor,

Re: “Three-Dimensional Analytical Solution of Self-potential from Regularly Polarized Bodies in Layered Seafloor Model”

Thank you very much for your valuable comments and suggestions regarding our paper. We have supplemented the literature review section, adding more relevant studies to provide a more comprehensive background and theoretical foundation for the paper. And we have added Table 2 to present the experimental results, including statistical information such as the mean and standard deviation. This addition ensures that the results are more clearly and comprehensively presented. The code and data have been published on Zenodo, and we have included the corresponding DOI link in the paper to allow readers to access and reproduce our results.

Thank you again for your review and constructive feedback. We hope these revisions meet your expectations and look forward to any further feedback you may have.

Best regards,

Pengfei Zhang
