The final modification on the manuscript

"NMH-CS 3.0: a C# Programming Language and Windows System based

Ecohydrological Model Derived from Noah-MP"

Dear editors,

Thank you for accepting our manuscript. There are no more comments from the reviewers. We found that some figures are redundant, so **we updated the original 10 figures to 8 figures now, by merging some of them**.

We feel appreciated for your great efforts.

Yonghe Liu
