

Dear editor,

We have addressed your comments in the new version of the manuscript:

l. 87: Equation (1) was changed to Equation 1

l. 167 and l. 170 (Eq. 10): The symbol τ has been substituted with τ_0 as suggested.

Finally, to avoid confusion regarding model version, we have now avoided the term “current model version” as suggested. The model version numbers v1.0.0 and v2.0.0 have been introduced and are now used in different places throughout the text.
